

Claims Listing

1. (Currently Amended) A net, ~~in particular a sports net, such as a volleyball net, tennis net, goal net or protective sports net~~, characterised by a mesh structure formed by a foil with holes distributed over its surface, said holes comprising a through opening completely circumscribed by a continuous outer edge, the net having an area ratio of holes to foil of 3:1 or more.
2. (Original) The net according to Claim 1, characterised in that the foil is provided with information that is printed partially or fully on one side or on both sides.
3. (Currently Amended) The net according to Claim 1 or 2, characterised by essentially square holes, ~~in particular having rounded corners.~~
4. (Currently Amended) The net according to ~~one of Claims 1 to 3~~, characterised in that bridges of the foil running between the holes, ~~in particular bridges running in the horizontal and vertical direction,~~ have different widths.
5. (Currently Amended) The net according to ~~one of Claims 1 to 4~~, characterised in that the size, shape and/or arrangement of the holes relative to each is/are adapted to the imprint and/or for an optimised flow of forces within the net structure, and if necessary varies/vary throughout the surface of the net.
6. (Currently Amended) The net according to ~~one of Claims 1 to 5~~, characterised by ~~an area ratio of holes to foil of 3:1 or more, in particular an area ratio of holes to foil of 4:1 or more.~~
7. (Currently Amended) The net according to ~~one of Claims 1 to 6~~, characterised by fixing means.
8. (Original) The net according to Claim 7, characterised by at least one loop running at least partially along one of the lateral edges of the foil.

9. (Original) The net according to Claim 7 or 8, characterised by a plurality of loops arranged adjacent to each other on one or more sides of the foil.
10. (Currently Amended) The net according to ~~one of Claims 7 to 9~~, characterised by a loop extending along at least 90% of the length of one lateral edge.
11. (Currently Amended) The net according to ~~one of Claims 7 to 10~~, characterised by lugs, ~~particularly reinforced lugs~~, in one or more edge regions of the foil.
12. (Currently Amended) The net according to one of Claims 1 ~~to 11~~, characterised in that the foil is a plastic foil, ~~in particular a plastic foil containing polyethylene, polypropylene, polyamide and/or PVC.~~
13. (Currently Amended) The net according to ~~one of Claims 1 to 12~~, characterised in that the foil has a textile structure whose fibres are glued or welded together.
14. (Currently Amended) The net according to ~~one of Claims 1 to 13~~, characterised in that the foil material is transparent or semi-transparent.
15. (Currently Amended) A method for manufacturing a net, ~~in particular a sports net according to one of Claims 1 to 14~~, wherein a foil is made available in which ~~the~~ through holes are made so that a net or mesh structure is formed.
16. (Original) The method according to Claim 15, characterised in that the foil is printed on one or both sides before the holes are made in the foil,
17. (Original) The method according to Claim 15, characterised in that the holes are punched out, welded out, cut or engraved.

18. (Original) The method according to Claim 15, characterised in that the shape, size and arrangement of the holes are adapted to an imprint.

19. (Currently Amended) The method according to ~~one of claims 15 to 18~~, characterised in that the shape, size and/or arrangement of the holes in the foil is/~~are~~ adapted to the flow of forces inside the net and varies/~~vary~~, if necessary, throughout the surface of the net.

20. (Currently Amended) The method according to ~~one of Claims 15 to 19~~, characterised in that at least one partial section of one side of the foil is folded over and the associated lateral edge is secured to the foil.

21. (Original) The method according to Claim 20, characterised in that the lateral edge of the side folded over or the lateral section folded over is welded to the foil.

22. (Currently Amended) The method according to ~~one of Claims 15 to 21~~, characterised in that one lateral edge is folded, coiled, glued or welded to ~~its reinforcement~~ reinforce said lateral edge.

23. (Original) The method according to Claim 22 characterised by folding or wrapping a string.

24. (New) The net according to Claim 1 adapted to be usable as a sports net.

25. (New) The net according to Claim 24 adapted to be usable as a volleyball net.

26. (New) The net according to Claim 24 adapted to be usable as a goal net.

27. (New) The net according to Claim 24 adapted to be usable as a tennis net.

28. (New) The net according to Claim 24 adapted to be usable as a protective sports net.

29. (New) The net according to Claim 3, wherein the square holes have rounded corners.
